Education

Dwarkadas J. Sanghvi College of Engineering (University of Mumbai) 2017 - 2021

Bachelor of Engineering (B.E.) in Computer Engineering Overall GPA: **9.86/10**

Applied Math, Discrete Math, Algorithms, Machine Learning, Artificial Intelligence, Natural Language Processing.

Experience

MBZUAI Nov 2022 - Present

Research Associate *Advisors: Yova Kementchedjhieva and Alham Fikri Aji*

- Study influence of multimodal bridges when unifying modality-specific expert models for multimodal downstream tasks.

AI4Bharat (IIT Madras) Aug 2022 - Apr 2024

AI Resident *Advisors: Mitesh Khapra, Anoop Kunchukuttan and Raj Dabre*

- Mined 5M high-quality bitext pairs from the web (ebooks, lecture transcripts, etc) using LaBSE and margin score.
- Developed SOTA IndicTrans2 translation models and created a challenging IN22 benchmark for 22 Indian languages. Notably, these models are used by the **Supreme Court of India** to translate legal proceedings and **Wikimedia Foundation** to translate Wikipedia content (Coverage).
- Developed efficient Indic-Indic (non-English) translation models by repurposing components from independently pretrained English-centric translation models. Distilled IndicTrans2 translation models with a **~5x reduction in model size** and **~36% reduced inference time**. Checkout the blog for more details.
- Study ICL abilities and its aspects in general-purpose, instruction-tuned and task-specific LLMs for the task of MT.

Research Collaboration June 2023 - Present

Independent Researcher (Remote) *Advisors: Sara Hooker, Julia Kreutzer and Bruce Bassett*

- Working on understanding the effective ways of data pruning for MT by leveraging *Checkpoints Across Time* (**CAT**).
- Experimental results demonstrate superior performance using perplexity from early model checkpoints compared to sentence embedding models for high-resource pairs (En-De, En-Fr) and vice-versa for low-resource pairs (En-Sw).

Research Collaboration Sep 2021 - Dec 2022

Independent Researcher (Remote) *Advisor: Zeerak Talat*

- Proposed cross-dataset generalization for hate speech detection using Federated Learning extending Fortuna et al. (2021).
- Experiments show around 10% improvement in f1-score with relatively less data compared to centralized training.

University of California San Diego Jun 2021 - Jun 2022

Research Intern (Remote) *Advisor: Pengtao Xie*

- Implementation of Learning from Mistakes for Neural Architecture Search (Garg et al., 2021) in PyTorch [Code].
- Proposed an efficient multi-level optimization algorithm as an extension to Garg et al. (2021) for improving NAS by conducting performance-aware data generation using class-wise evaluation during the architecture search.
- Model-agnostic framework that can be coupled with any gradient-based (differentiable) search approaches.

Tata Consultancy Services Dec 2019 - Feb 2020

Machine Learning Intern

- Developed models using VAEs and K-means clustering for customer behavior analysis to prevent customer churn.
- Prepared a custom dataset by developing surveys to handle open-ended and closed-ended questions.
- Extracted feedback responses from handwritten survey forms using OCR achieving 12% CER and 18% WER.

Projects

Ocubot - Image-based Dialog [Code] *Advisor: Prof. Pratik Kanani*

- Bachelor's project which focused on improving performance on the multimodal task of Visual Dialog.
- Adversarial analysis of existing systems to identify modality biases towards historical context and salient visual features.
- Reduced modality biases by improving visual context with dense captions and attention over these captions.
- Achieved competitive performance to the baseline with around 70% training data (85K images out of 120K images).

Anomaly Detection in ECG Signals *Advisor: Prof. Pratik Kanani*

- Industry collaboration to develop neural models for detecting anomalies in processed ECG signals from IoT devices with a human-in-the-loop approach to semi-automate the process while ensuring the safety of human lives.
- Applied distributed computing algorithms for speed improvements during inference and load balancing by 60%.

C Programming Exam Portal [📹]

- A paperless solution for conducting C programming exam for over 500 students at D. J. Sanghvi institution.
- Generated data-driven detailed reports for students and instructors to enhance the overall learning experience.
